Holt Bill Must Be Amended to Ban Unverifiable Ballots

WITH such an Amendment, the bill requires this:

You mark your ballot, and it’s counted.

Choices you mark and verify here …

either by hand

or with a non-tabulating ballot-marking device

… are counted here by a scanner …

… or here, by hand.

Voter Assistance: YES

WITHOUT such an Amendment the bill allows this:

You verify your ballot twice, but something else is counted.

Choices you verify here …

… and here …

on a “paper trail” machine

… have little chance of ever being counted even in an audit.

Instead, an unverifiable “electronic ballot” counts as your vote, even though you never approved it.

Unverifiable Ballot: NO

A Ballot Should NOT be a Secret from the Voter Who Cast it!
